Foreword

This Namibian standard, NAMS 0007: 2019 – Requirements for cultured and fermented cow milk products is a new Namibian developed Standard. The Namibian Standards Institution (NSI) Subcommittee on Milk and milk products (TC3/SC2) is responsible for the development of this Standard

The NSI is Namibia's National Standards Body (NSB) responsible for coordinating all standardization and quality assurance activities in the country and represents Namibia at regional and international standardization bodies. The work of developing Namibian Standards is normally carried out through NSI Technical Committees (TCs) and Sub-Committee (SC). Each organization or individual interested in a subject for which a technical committee has been established has the right to represent that committee.

Namibian Standards are prepared in accordance with NSI Standards development procedures, in compliance with the rules given in the International Organization for Standardisation/International Electrotechnical Commission (ISO/IEC) Directives 1, and World Trade Organisation/Technical Barriers to Trade (WTO/TBT) Code of Good Practice, annex 3

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. NSI shall not be held responsible for identifying any or all such patent rights.

This document was approved for publication in August 2019
