NAMIBIAN STANDARD

Refrigerating systems and heat pumps-Safety and environmental requirements- Part 4: Operation, maintenance, repair and recovery

This Namibian standard is the identical implementation of ISO 5149-4: 2014 and is adopted with the permission of the International Organization of Standardization

Published by the Namibian Standards Institution (NSI)
Established by section 2 of the Standards Act, 2005 (Act No 18 of 2005)

National Foreword

This Namibian Standard (NAMS) is identical to International Standard ISO 5149-4 Refrigerating systems and heat pumps-Safety and environmental requirements and was approved for adoptions by the Namibian Standards Institution CEO.

Namibian standards are developed based on NSI Standards development procedures in accordance with the rules given in the International Organisation for Standardisation/ International Electrotechnical Commission (ISO/IEC) Directives 1, ISO/IEC Guide 21-1 Adoption of international standards as regional or national standards and WTO – TBT World Trade Organisation code of Good Practice (which is published as Annex 3 in the TBT Agreement)

The NSI Management Technical Committee responsible for the standard is NSI TC on Refrigeration and Air-conditioning.

This ISO 5149-4: 2014: NAMS 5149-4:2021 was published in April 2021

**Refrigerating systems and heat
pumps — Safety and environmental
requirements —**

**Part 4:
Operation, maintenance, repair and
recovery**

*Systèmes frigorifiques et pompes à chaleur — Exigences de sécurité et
d'environnement —*

Partie 4: Fonctionnement, maintenance, réparation et récupération

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General requirements	1
4.1 Operation instructions.....	1
4.2 Instruction of operating personnel.....	2
4.3 Documentation.....	2
5 Maintenance and repair	2
5.1 General.....	2
5.2 Maintenance.....	3
5.3 Repair.....	3
5.4 Change of refrigerant type.....	4
6 Requirements for recovery, reuse and disposal	5
6.1 General requirements.....	5
6.2 Requirements for recovery and reuse of refrigerant.....	6
6.3 Requirements for refrigerant transfer, transport and storage.....	9
6.4 Requirements for recovery equipment.....	10
6.5 Requirements for disposal.....	11
6.6 Requirements for documentation.....	12
Annex A (normative) Draining the oil from a refrigerating system	13
Annex B (informative) Guide specification (parameters) for recycled refrigerant	14
Annex C (informative) Handling and storage of refrigerants	15
Annex D (informative) In-service inspection	20
Annex E (informative) Corrosion inspection	22
Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 5149-4 was prepared by Technical Committee ISO/TC 86, *Refrigeration and air-conditioning*, Subcommittee SC 1, *Safety and environmental requirements for refrigerating systems*.

This first edition of ISO 5149-4, together with ISO 5149-1, ISO 5149-2 and ISO 5149-3, cancels and replaces ISO 5149:1993, which has been technically revised.

ISO 5149 consists of the following parts, under the general title *Refrigerating systems and heat pumps — Safety and environmental requirements*:

Part 1: Definitions, classification and selection criteria

Part 2: Design, construction, testing, marking and documentation

Part 3: Installation site

Part 4: Operation, maintenance, repair and recovery
